Description

This website is an interactive experience for Pokemon Trading Card Game enthusiasts. Users will be able to buy, sell, and trade digital Pokemon cards with people from all over the world. The three APIs that we will be using are:

API	What is it used for?
Pokémon TCG	This API will be used to get information about the Pokemon cards such as the image and name of the Pokemon
Deck of Cards	This API will be used to store the Pokemon cards a user has??
Foreign Exchange Rates	This API will be used to calculate the prices of Pokemon Cards in the marketplace

List of Features *(minimum viable product features are indicated by a *)*

- Account Management
 - View Pokemon cards user currently has*
 - View cards user is currently selling*
 - View amount of money user has*
 - Users can change their current location*
 - View "Saved" cards that are on sale
 - View Recently viewed cards
 - View Purchase History
 - View Selling History
 - View Refund Requests
- Marketplace
 - Buying*
 - Users can buy* or offer a bid on cards at the marketplace
 - Lists cards available for sale
 - Users can sequence viewing of cards by price or popularity*
 - Users can filter viewing of cards*
 - Refreshes every XX minutes

- Shows price of cards with the currency of the location the user is at
- Selling*
 - Users can sell* or auction their cards at the marketplace
 - Selling prices will refresh every XX minutes
- Trading*
 - Users can put their cards up for trade by requesting another card (and money) in place of the one they have
 - Users can view trade requests and accept them
- Request a Refund
 - Users can request refunds for past purchases
